The Division of Endocrinology at the University of Pittsburgh (Pitt) and its affiliated Medical Center (UPMC) seeks MD or MD/PhD candidates who are board certified/eligible in Endocrinology for a full-time academic faculty position in its Multidisciplinary Thyroid Center (MTC).

Pitt/UPMC has a well-established MTC that includes endocrinologists, endocrine surgeons, otolaryngologists, neuro-ophthalmologists, oncologists, radiologists, radiation oncologists, oncologists, and translational scientists. Together, the MTC team has a long history of clinical and academic excellence in virtually all aspects of thyroid disease, particularly in the use of molecular approaches in the diagnosis and treatment of thyroid disease. The program includes multidisciplinary thyroid clinics, several thyroid conference series, a quality improvement program, and ongoing research / scholarly work. The multidisciplinary nature of the thyroid program provides outstanding patient care as well as a rich environment for training and career development.

To further expand this academic excellence, Pitt/UPMC is seeking a full-time academic endocrinologist to join the Multidisciplinary Thyroid Team. Candidates should have (or potential to have) strong academic expertise in thyroidology and should be willing to contribute to all aspects of the academic mission (clinical care, education, and scholarly work). Although a major focus of the position is on clinical care and education, candidates with research interests/qualifications and potential for external funding in the field of thyroidology/thyroid cancer would be highly desirable. There is also significant opportunity for leadership within the Multidisciplinary Thyroid. The primary appointment will be in the Division of Endocrinology within the Department of Medicine. An academic appointment at the University of Pittsburgh would be commensurate with experience, training, and achievement.

Interested candidates should send a cover letter, curriculum vitae, and contact information for three references to Erin E. Kershaw, MD, Chief of Endocrinology, care of Chelsea Dempsey (email: cad183@pitt.edu).

*Pitt/UPMC is an equal opportunity employer and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, disability status, protected veteran status, or any other characteristic protected by law.*
